

1. Nitrogen Requirements by Crop

Rice (Kharif): Apply 120 kg N/ha in 3 splits (60 basal, 40 tillering, 20 panicle initiation).

Wheat (Rabi): Apply 120 kg N/ha in 3 splits (60 basal, 40 CRI stage, 20 boot leaf).

Maize: Apply 150 kg N/ha in 3 equal splits (basal, knee-high, tasseling).

Cotton: Apply 120 kg N/ha (30 basal, 60 squaring, 30 boll development).

Sugarcane: Apply 250 kg N/ha in 3 splits.

2. Soil Nitrogen Interpretation

< 50 mg/kg: Very Low. Apply 120-150 kg N/ha.

50-100 mg/kg: Low. Apply 80-120 kg N/ha.

100-150 mg/kg: Medium. Apply 60-80 kg N/ha.

150-200 mg/kg: High. Apply 30-60 kg N/ha.

> 200 mg/kg: Excess. Withhold N application to prevent lodging and pest susceptibility.
